

BATON® with Telestream FlipFactory

BATON's integration with Telestream FlipFactory helps customers achieve content readiness & consistency across media outlets like playout, VOD, mobile and web.

File-based digital media has changed the way media is delivered across end user devices, thus raising the potential for **content monetization** and **operational efficiencies**. Operational efficiency can improve when content quality is assured despite multiple transformations across various stages of the content lifecycle.

All the conversions and transformations leading up to media delivery make it an imperative for broadcasters to maintain the end user content quality. Therefore, media validation needs to be automated using an intelligent and flexible environment that can process huge volumes of data in an accurate and consistent manner.

BATON

BATON, industry's leading enterprise-class automated file-based QC solution is used by major broadcasters, post-production houses, IPTV, satellite and archiving companies for its thorough list of quality checks and enterprise-wide scalability.

BATON has been deployed in production use by global media companies of all sizes. BATON supports a wide range of media formats and offers comprehensive quality checks, including extensive subtitles and CC verification, audio language identification, PSE correction, loudness detection and correction. BATON's powerful Media Player for frame-accurate review, rich QC analytics and smart workflow tools are the best in class in the industry.

Solution Overview

- BATON file-based QC solution leveraging Telestream FlipFactory's repurposing capabilities
- Automate quality checks on media content and minimize manual QC
- Ensure consistency in content quality across formats, platforms

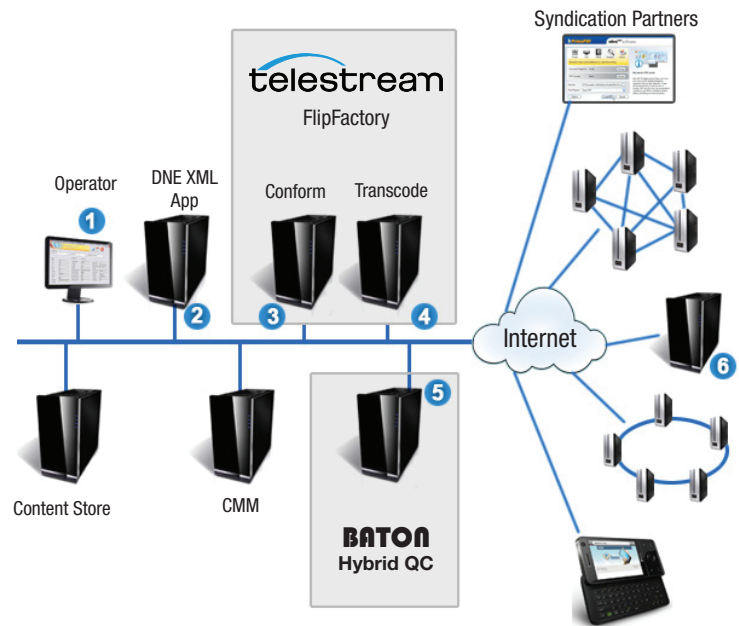

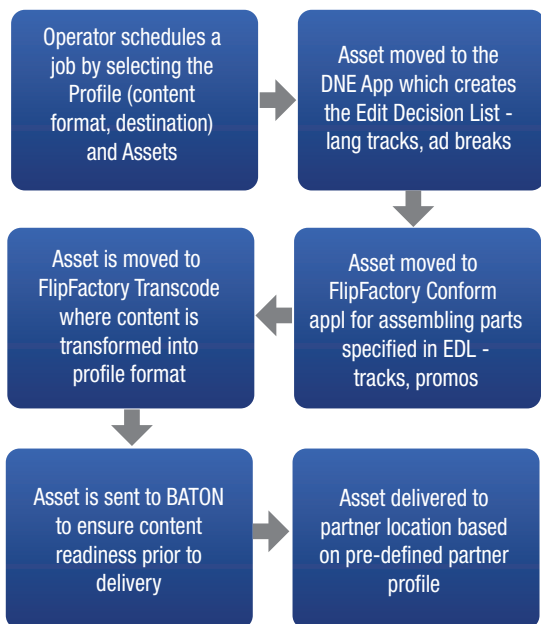

Telestream FlipFactory

Telestream specializes in products that make it possible to get video content to any audience regardless of how it is created, distributed or viewed. Telestream products range from desktop components and cross-platform applications to fully automated, enterprise-class digital media transcoding and workflow systems that enable users in a broad range of business environments to leverage the value of their video content.

BATON Integration with Telestream FlipFactory

To ensure content readiness throughout the repurposing process, Interra's BATON is integrated with Telestream FlipFactory. This benefits you by ensuring that content quality is consistent across media outlets like playout, VOD, mobile and web.

The following figures illustrate an overview of the BATON integration with Telestream FlipFactory for a large media corporation. This BATON based solution includes transcoders from Telestream and Signiant's Central Media Manager (CMM) to build the workflows with a series of components.

BATON file-based QC solution integration with Telestream FlipFactory

BATON - Key Features

- A comprehensive ML/AI enabled QC solution, available for Windows
- Hybrid QC platform with a combination of automated & manual QC checks on content
- Supports SD, HD, UHD, 4K Mixed workflows
- Intuitive, simplified and a very user-friendly web-based user interface
- Extensive time code related checks including start TC / discontinuity / GOP / LTC, VITC and more
- Built-in Test Plans for various Standards and Workflows such as DPP, iTunes, Netflix, Cable Labs, ARD_ZDF, Ingest, Playout and more
- First QC system to support VAST formatted ads
- Supports S3, Spectrum, Azure Blob Storage AMP, Avid Interplay and Google Cloud Servers, HTTP Server, IBM Cloud Object Storage, OpenStack Swift based storage
- Rich reporting features:
 - Multi-language reports in HTML, XML, PDF, Excel and JSON
 - Reports based on analytics, timeline, content structure and thumbnails
 - Incremental reports of tasks in progress
 - Compact reports to analyze verification summary
 - Options to comment, tag, rate and compare reports
 - Configurable e-mail, HTTP alerts including SNMP
- Supports user management & access control
- Comprehensive solution for task scheduling & monitoring
- Support for SOAP, XML-RPC, and REST APIs
- Efficient integration with media servers, transcoders, MAM archiving and workflow solutions through its easy to use web-services based APIs
- Scalable architecture for expansion of the BATON set up as QC needs grow
